

A. Front (monotone) and back front.
Shaded purple: the uninterrupted flowing block

B. The $\sqrt{t}$ test — straight lines mean $R \propto \sqrt{t}$.
A STAIRCASE: each step is a rate increase, so $\sqrt{t}$ is a trend, not the mechanism

C. Two MODEL-FREE diffusivities.
Ratio 5.9x = the permeability enhancement
(the decks assume 250x)
