

Fluid A vs B, uniform initial permeability  
 fixed:  $\mu_0=0.37$ , permev T, uniform  $k_p = k_{pmin} = 1e-15$ , parameterfromfile F  
 $A = \eta \ 8.9e-4$  with the parent's  $\beta$ ;  $B = \eta \ 1.27e-4$  with  $\beta \times 7.007874$  so D is unchanged  
 all fits on 0-5 d, observed front refit on the same window
